

PRESENTS

## COMMUNITY CONNECTIONS

# From Confusion To Clarity:

Understanding Psychological & Neuropsychological Testing

## If your child....

Has received psychoeducational or neuropsychological testing

Experiences difficulties with attention, concentration, memory

Academically performs below grade level

Takes longer to complete classwork, homework, timed tests

*....and you wonder....*

What does it mean?

Do they have ADHD?

Do they have a learning disability?

Is there something wrong?

Is their learning style a different match from their teacher's  
instruction style?

Join us for a brief presentation  
& plenty of time for discussion & questions!
